## Angelo Lorenzi's Farm (Calvisano - BS - Italy)

### Farm Characteristics

Type of animal	Fattening pigs
No. of animals	1,100 fattening pigs
Housing type	<input checked="" type="checkbox"/> slats <input checked="" type="checkbox"/> pens
SOP products used	SOP GOLD PIG

Mr. Angelo Lorenzi told us:

*“The first time I heard of the SOP products was during the Montichiari fair in 2001. I was looking for a product to reduce ammonia in the barn and during manure spreading on the crops.*

*Another big problem for our farm was pumping the liquid manure from under the slats, to the pit; each time would require the addition of at least a barrel of water, to avoid sediment deposits in the pipes.*

*For this reason, in the Spring of 2002, we began using **SOP M PIG**.*

*I apply it using a back-pack duster and, in no time at all, the nebulized product can be sprayed throughout the whole the barn.*

*The results came quickly. After just a month, there was a **50% reduction in ammonia**.*

*Due to the lower levels of ammonia and bad odors, **the animals are now much calmer and consequently less aggressive**.*

There is so **much less smell** in the barn that I can wear the same clothes all day, without problems.

**Pumping operations are now much easier** and it is no longer necessary to add water. The liquid manure in the storage pits remains **completely fluid** and there are no more difficult crusts.

During spreading, there is **no longer a problem of odor** and my neighbours don't complain anymore.

Now that a few years have passed," concluded Mr. Lorenzi, "I can confirm that the SOP products are a very good thing, both for my animals and for me!

In January 2020, I changed over to using **SOP GOLD PIG** and I have noticed even better results regarding both odor in the barn and spreading operations.

Now with **SOP GOLD PIG** [the liquid manure] is even more fluid and I am satisfied by the fact that [the product] is really **easy to use.**"
